- English – Professional working proficiency

INTERESTS

- Secure Communications
- Defense Technology
- Agentic AI Workflows
- Forecasting & Decision Analytics
- Enterprise Software & SaaS
- Digital Transformation
- Gamification & Behavioral Design
- Hiking

MURAT KAAN SEÇKİN

Industrial Engineer | Project Manager

ABOUT ME

Industrial Engineer from Boğaziçi University, currently working as a Researcher and Project Manager at TÜBİTAK BİLGEM on enterprise and defense messaging systems. Internships, competitions and an Industrial Engineering graduation project built my background in data analysis, optimization and business processes. I enjoy turning practical problems into digital solutions and regularly build small tools for my own workflows, such as project-management utilities, enterprise messaging test automation and personal side projects. Lately I have been exploring AI-assisted development and agent-based workflows to automate repetitive work and make outputs more reliable.

WORK EXPERIENCE

Researcher / Project Manager Aug 2025 – Present

TÜBİTAK BİLGEM, Gebze – Project Management Office, Digital Asset Technologies

- Joined as a candidate researcher (Aug 2025), became a full-time researcher (Dec 2025) and was promoted to Project Manager for Safir Posta (Jan 2026), a national secure enterprise messaging solution, while supporting project management activities for national defense messaging projects.
- Own scope clarification and work breakdown, schedule, budget and resource planning, dependency and risk tracking, stakeholder and customer coordination, and delivery and status reporting.
- Manage requirements and priorities, sprint and release planning, Jira backlog tracking and test to production handover; triage customer test findings into actionable items and plan post release improvements.
- Conduct market research to shape the Safir Posta product roadmap.
- Attended NATO TIDE Sprint (İstanbul, May 2026), a multinational event on AI and digital transformation.
- Completed training in risk management and project management.

Internal Control Intern

Aug 2024 – Jul 2025

Borusan Cat, Gebze

Monitored business units across five countries and conducted risk analyses to support process improvement.

Stars for Starbucks Program Participant

Jul 2024 – Aug 2024

Starbucks, İstanbul

Delivered two projects: a demand forecasting model with a brewing schedule for filter coffee, and a gamification concept for customer experience.

Platform and Business Solution Analyst

Mar 2024 – Jul 2024

IBTech, İstanbul

Took part in business analysis projects; performed data extraction and reporting with SQL.

Work and Travel

Jun 2023 – Oct 2023

Ohio, USA

Worked in several hands-on operational roles over four months; strengthened English communication skills in customer facing environments.

Process Development Intern

Aug 2022 – Mar 2023

Kuveyt Türk Participation Bank, İstanbul

Took part in process development projects; gained experience in project management, agile methods, process mining.

EDUCATION

Boğaziçi University – B.S. Industrial Engineering Sep 2019 – Oct 2025

İstanbul – National university entrance exam rank: 630th in Turkey

Senior Project: "Optimizing Campaign Management for Resident Tutors" with Kunduz (Grade: AA). Analyzed 20M+ records; built demand forecasting, dynamic pricing and queueing-theory models to improve fulfillment and cost efficiency.

Activities: TEMA Boğaziçi Team Member, BÜMED Student Team Member.
